🕐

Day 5

Worked on an Android App and Tested it for SSL Pining and Root and Emulator Checks.

It wasn't like PT, It was more like testing if things are working as expected or not. And let the Devs know about it. So that they can further procced with their Build.

Worked on Frida to test SSL pining Bypass.

Configured Device and Emulator for Android App Testing.

ADB to work with Physical Device.

APKTool to the Decompiling and Re-compiling Stuff.

Burpsuite

Unfortunately can't share much about the project.

🤿 ADB COMMANDS

📍 SSL PINNIG
